

# PIGMENT COLOR CHART

## **PMU-line's PIGMENTS, A QUALITY GUARANTEE**

To create its sterile pigments, PMU-line uses only extremely pure raw materials composed of mineral and organic pigments.

Selected for their high tinting strength, they offer an ideal chromatic stability and a dispersion suited to the skin's pH, without the addition of preservatives.

**PMU**-line ®  
Permanent Makeup Products

**MULTIPLE USE STERILE PIGMENT- MANUFACTURED IN MEDICAL LABORATORY IN EU - SINCE 1999**

Manufactured in EU in a controlled atmosphere in certified laboratory ISO 9001, EN13485 and GMP, PMU-line pigments are the result of a precise blend of organic and mineral pigments, which are subject to rigorous controls: analysis of heavy metals and aromatic amines. They are in perfect conformity with the recommendations of European legislation, one of the most rigorous in the world. PMU-line pigment is easy to use thanks to an ultra-precise pump and remains sterile between each use. Without preservatives, water or petrochemical products, PMU-line pigments are adapted to the skin's pH.

## MULTIPLE USE STERILE PIGMENT- MANUFACTURED IN MEDICAL LABORATORY IN EU - SINCE 1999

Manufactured in EU in a controlled atmosphere in certified laboratory ISO 9001, EN13485 and GMP, PMU-line pigments are the result of a precise blend of organic and mineral pigments, which are subject to rigorous controls: analysis of heavy metals and aromatic amines. They are in perfect conformity with the recommendations of European legislation, one of the most rigorous in the world. The PMU-line pigment is easy to use thanks to an ultra-precise pump and remains sterile between each use. Without preservatives, water or petrochemical products, PMU-line pigments are adapted to the skin's pH.

### 100%

- Absolutely sterile and hygienic
- 5-year shelf life after production (unopened)
- 100% biocompatible and perfectly matched to the skin's natural pH
- Produced in the EU in a certified medical laboratory since 1999 in accordance with ISO 9001, EN13485 and GMP
- Ingredients and all base materials are 100% natural origin environmentally friendly and vegan

### 0%

- 0% preservatives
- 0% latex
- 0% PPD
- 0% petrochemical derivatives
- 0% nanoparticles
- 0% water
- 0% paraben
- Not tested on animals

### PRODUCT DETAILS

Perfect dosage and sterility throughout - the pigment comes in an airless bottle which is easy to use thanks to an ultra-precise pump and it remains sterile between treatments.

Safe and fully compliant with relevant legislation. Passes the most stringent testing described in Resolution ResAP (2008) 1.

Complies with European standards for medical devices CEIIb.

Labelling complies with European legislation on tattoos and permanent make-up products and makes it possible to identify and trace the products.

Produced and packaged using the latest medical technology in clean rooms with a class C and D controlled atmosphere. They are then sterilized by gamma radiation at a dose greater than 25 kGy in accordance with validated industrial applications.

The precise combination of organic and mineral pigments is subjected to strict control and analyzed for heavy metals and aromatic amines.

### BENEFITS

#### 1 bottle has a MINIMUM of 40 treatments

Microblading pigments have high viscosity, which optimizes pigmentation.

Amazingly easy to work with and treatments take significantly less time.

Ultra-fast setting and long-lasting results (no need to replenish).

Maximum pigment concentration guarantees long-lasting, stable color.

Developed for all types of pigmentation (PMU, scalp, areola pigmentation, microblading, softap, scar and vitiligo camouflage), PMU-line pigments offer you perfect compatibility with all equipment and treatment techniques.

The color won't shift to red or blue thanks to the "biocoating" of pigment particles.

It won't evaporate or dry out during treatment.

Stable, intense shades for all skin types and ethnicities.

The wide range of shades allows you to offer your clients the perfect custom pigment for their skin type and guarantee them a natural look.

More than 100 colours

DTP: 12 months

Ultra fast setting

Vegan Labelled

Vegan dispersant

Sterility 5 years

Traceability by batch no.

Approved RESAP 2008
